ABOUT VARIOUS OPPORTUNITIES...

PROPOSED MECHANISM

The Foundation for the Florida Conference of Black State Legislators throughout the year, partner with the Florida Legislative Black Caucus to address various issues and/or concerns that adversely impact Constituents and/or Communities Statewide. One of our flagship philanthropic goals are to award scholarships to deserving students seeking higher educational and/or trade opportunities. Additionally, we support the development of public policy proposals, and/or legislation, to address what are the best practices to improve the conditions enabling communities to thrive and have opportunities to enhance future generations to come. New Legislation is often generated as a result of this process and current Legislation is amended to meet the changing times in which we live. We invite industry representatives to contact us to exchange ideas and initiatives. Developing relationships is a vital component of working together as we strive to make Florida the best state we call home.
